A veritable development swiss-army knife. Graduate of the 16-week Full Stack Web Development program at DigitalCrafts. Experience in QA, Project Management, Consulting, and Product Management roles. Georgia Tech grad and certified Scrum Product Owner and Scrum Master. Seeking a development job on a supportive, high-performing team to accelerate my career.

## PROJECTS

### Heatseeker ([GitHub](#))

DigitalCrafts capstone project, frontend built in React Native and backend built in Node, Express, and PostgreSQL.

- Heatseeker is the ultimate sneakerhead companion. As sneaker raffles are announced in your area, Heatseeker notifies you and tells you how and when to enter so that you never miss your chance at getting the hottest sneakers.

### Astrologic ([GitHub](#))

Front-end project leveraging HTML, CSS, Javascript, the Wikipedia API for images and an Astrology API for horoscopes.

- Astrologic is a tool to help fantasy sports enthusiasts optimize their rosters. Search for athletes and use their horoscope to get insight into their future performance.

### DigitalCrafts Project Database ([GitHub](#))

Back-end project using Node and Express, database built with PostgreSQL, and a front-end in HTML, CSS, and Javascript.

- The DigitalCrafts Project Database is a tool for DigitalCrafts students to host their projects for other students to see. Students in future cohorts can use it to get inspiration for projects or to search for similar projects.

## EDUCATION & CERTIFICATIONS

**Full-Stack Software Development**, DigitalCrafts - Atlanta, GA (2019)

**Product Management**, General Assembly - Atlanta, GA (2016)

**Bachelors of Science in Industrial and Systems Engineering**, Georgia Institute of Technology - Atlanta, GA (2013)

## CERTIFICATIONS

## EXPERIENCE

**Product Manager**, OneTrust - Atlanta, GA

10/2018 - 4/2019

OneTrust is the leading privacy management software platform for operationalizing data privacy compliance and privacy by design.

Served as Product Manager for [Vendorpedia](#), a security and privacy third-party risk exchange.

- Launched Vendorpedia, a Security-Assessments-as-a-Service platform that streamlines the process of vetting third-parties when creating and managing privacy programs.
- Built a database of over 6000 vendor privacy profiles, gathered from publicly available and proprietary data sources.
- Worked directly with the CEO and other internal stakeholders to build the roadmap, go-to-market strategy, and marketing.
- Managed a team of 16 developers, split among back-end, front-end, onshore and offshore.
- Worked with design and engineering leadership to plan sprints and build user stories with acceptance criteria.

**Product Manager**, MemberSuite - Atlanta, GA

2/2018 - 7/2018

MemberSuite builds B2B2C Association Management Software (SaaS) for nonprofits across the United States.

Served as Product Manager for the Portal product, the customer engagement portion of the product suite.

- Launched overhaul of MemberSuite's customer-facing platform. Trained customer service and success teams, collaborated with marketing, created release plans, and worked with senior leadership to define the product roadmap.
- Wrote user stories, groomed the backlog, and planned sprints for team of 2 designers, 2 testers and 10 engineers.
- Conducted user interviews both over the phone and in person to collect feedback on problems customers' wanted to solve.

**Project Strategist**, Big Nerd Ranch - Atlanta, GA

6/2017 - 2/2018

**Product Owner**, eVestment - Atlanta, GA

2/2016 - 6/2017

**QA Analyst**, eVestment - Atlanta, GA

5/2014 - 2/2016

**Systems Engineer Analyst** (Infrastructure Services), Avanade - New York, NY

6/2013 - 5/2014
